

WORK NOTICE

Marina Bay Project

Area T – East Shore Areas

Richmond, California

September 2006

Field Work being conducted beginning the week of Sept. 25, 2006

The Department of Toxic Substances Control (DTSC) is distributing this notice to inform the community about upcoming work within the Marina Bay Area (Harbour 11-A Redevelopment Project) located in Richmond, CA (see map on back). Area T is located northeast of Peninsula Drive and north of Marina Bay Parkway and Shimada Friendship Park. The cleanup of paint and paint debris, petroleum hydrocarbons, pond sediments and lead impacted soil was approved by the DTSC in the 1993 Marina Bay Development Final Remedial Action Plan (RAP). On May 13, 2005, DTSC approved a RAP Amendment to change the remedy from constructing an asphalt cap to soil excavation and offsite disposal. On January 26, 2006, DTSC approved the Remedial Design and Implementation Plan (RDIP). The RDIP addresses excavation, stockpiling, backfilling and hauling of contaminated material for offsite disposal.

Workers will be at the site beginning the week of September 25, 2006 between 8:00 A.M. and 5:00 P.M. The work will take approximately 30 days. The following activities will take place:

- **Heavy equipment will be used at the site to excavate soil.**
- **Excavated soil will be placed in dump trucks and moved to an onsite staging area for stockpiling. Plastic sheeting will be used below the stockpiles. Stockpiles will also be covered with plastic sheeting to prevent dust emissions.**
- **Excavations will be backfilled with clean soil.**
- **Soil will be kept damp to minimize dust during the excavation process.**
- **Dust monitoring will be conducted during excavation, stockpiling and loading activities.**
- **Trucks will be decontaminated and all off-haul materials will be covered prior to leaving the Site.**
- **Trucks transporting excavated soil from the Site will travel east on Peninsula Drive and north on Marina Bay Parkway to Interstate 580.**
